

## REMARKS

In the specification, the last full paragraph on page 32 is amended to clarify that a control system includes a memory element. Applicants submit that no new matter is introduced by this amendment. Support for this amendment may be found on page 29, lines 6-8, page 32, lines 12-14, page 35, lines 27-30, page 36, lines 2-14 and page 36, lines 28-29. Applicants respectfully submit that a person having ordinary skill in the art would understand that a control system capable of the specified functions would contain a memory element. Furthermore, the preferred embodiment of the control system is a server. A person having ordinary skill in the art would recognize that a server contains a memory element.

Figure 10 has been amended to show a memory element 2086, as indicated in red on the sketch filed herewith. Applicants submit that no new matter is introduced by this amendment. Support for this amendment to the drawings can be found on page 29, lines 6-8, page 32, lines 12-14, page 35, lines 27-30, page 36, lines 2-14 and page 36, lines 28-29.

Applicants hereby amend claim 1 to more particularly point out and distinctly claim the subject matter that the Applicants regard as their invention. Support for claim 1 can be found throughout the specification, and at least on page 10, lines 12-19. Support for claims 22-26 can be found on page 8, lines 27-28, page 9, lines 3-5 and page 37, lines 24-26. Accordingly, no new matter has been added. The opportunity has been taken to correct "media" to "medium" at two places in the claims where a singular is clearly intended. Applicants submit that claims 1-7, 9-19 and 21-26 are in condition for allowance and respectfully request entry as such.

A Patent Application Fee Determination Record (Form PTO/SB/06) and a Fee Transmittal in payment of the fees for the additional claims added by this Preliminary Amendment are filed herewith.

Respectfully submitted
